CERTIFICATIONS

- Terraform Associate (004)
- Kubernetes & Cloud Native Associate
- Azure Data Engineer Associate
- DevOps & SRE: Continuous Delivery
- Databricks Certified Data Engineer Professional

LANGUAGES

- Spanish — Native
- English — Fluent
- French — Professional

AWARDS

- Third Prize · 2017
IMC for University Students, Bulgaria
- Bronze Medal · 2016
Olimpiada Iberoamericana de Matemática
- Honorable Mention · 2016
Olimpiada Iberoamericana

PROFILE SUMMARY

Data Engineer building cloud-native data platforms across AWS, Azure, and Databricks. Experienced in metadata-driven ingestion, ETL pipelines, and GenAI/RAG systems, with a DevOps-first approach to CI/CD, observability, and infrastructure automation. Background spans data engineering, MLOps, and cloud platform work in banking, chemicals, and travel.

CORE STACK

Languages & Backend: Python (Pydantic, SQLAlchemy, SQLModel, pandas, boto3, FastAPI, uv, Poetry), SQL (stored procedures, views, window functions), Bash scripting

Data & ML: Databricks (Asset Bundles, Unity Catalog, Delta Lake, Autoloader, Workflows, MLflow), PySpark, Snowflake, SageMaker, EMR, CDC pipelines

Cloud: AWS (Lambda, AppRunner, SQS, S3) · Azure (Data Factory, Storage Accounts, Resource Groups, VNETs)

GenAI: RAG, Azure OpenAI/LLM, TextExtract

Infra & DevOps: Docker (multi-stage builds, devcontainers, Compose), container registries (ECR/ACR, Artifactory, GHCR), Kubernetes, Terraform, Ansible, GitHub Actions, Azure DevOps (CI/CD workflows), Git, Datadog, Grafana, ServiceNow

Developer Tooling: Neovim, VS Code, tmux, DBever, GitHub Copilot, Claude Code

EMPLOYMENT HISTORY

- Data Platform Engineer** 2026 – Present
Amadeus, Madrid, Spain
- Onboard client teams onto the Big Data Platform, enabling self-service adoption of Databricks, Snowflake, and AI services.
 - Provide consultancy to internal Amadeus teams to optimize workflows and automate ServiceNow incident handling.
- Senior Cloud Data Software Engineer — Team Lead** 2025 – 2026
BASF, Madrid, Spain
- Led the design and development of a metadata-driven ingestion framework, ingesting data from SAP, Kafka, and REST APIs into Delta Lake via Databricks, governed through Unity Catalog.
 - Built user notifications and Datadog dashboards for pipeline observability.
 - Maintained and resolved incidents on existing Azure Data Factory pipelines sourcing from SAP and SQL Server.
- Machine Learning Engineer** 2023 – 2025
BBVA AI Factory, Madrid, Spain
- Deployed an E2E OCR tool using TextExtract, Azure LLM, and AppRunner.
 - Implemented a RAG pipeline for a Financial Plan creation chatbot.
 - Built and optimized ETL jobs with Python, PySpark, SageMaker, EMR, and S3.
 - Collaborated with data scientists to implement and scale models in production.
 - Created Docker images to replicate the CI/CD environment.
- Big Data Engineer** 2022 – 2023
Adaltas, Paris, France
- Developed end-to-end architecture with Cloudera Data Platform on AWS.
 - Presented on Vector Databases: Milvus Overview at the Summit (Morzine, France).
 - Utilized Terraform, Ansible, and Vagrant; contributed to [TDP](#) open-source project.
- Mathematical Models Developer** 2020 – 2022
Banco Nacional de Costa Rica, San José, Costa Rica
- Developed ML projects for risk departments using Python and Matlab.
 - Designed parametric model for ATM failure classification; built IFRS 9 expected loss models with EY.

EDUCATION

- Applied MSc in Data Engineering for AI** 2021 – 2023
DSTI School of Engineering, France · Summa Cum Laude
- MSc in Mathematical Methods & Applications** 2020 – 2023
Universidad de Costa Rica
- Bachelor of Mathematics** 2015 – 2019
Universidad de Costa Rica · GPA: 3.7
