SKILLS

- Python · PySpark · SQL
- AWS · Azure
- Terraform
- Databricks · Snowflake
- Docker · Kubernetes
- DevOps / CI/CD
- C++ · Git

CERTIFICATIONS

- Terraform Associate (004)
- Kubernetes & Cloud Native Associate
- Azure Data Engineer Associate
- DevOps & SRE: Continuous Delivery

LANGUAGES

- Spanish — Native
- English — Fluent
- French — Professional

AWARDS

Third Prize · 2017
IMC for University Students, Bulgaria

Bronze Medal · 2016
Olimpiada Iberoamericana de Matemática

Honorable Mention · 2016
Olimpiada Iberoamericana

PROFILE SUMMARY

Data (Platform) Engineer working where data, software, and infrastructure meet. Experienced in designing and deploying end-to-end ML models, building robust ETL pipelines, and automating workflows for scalability and efficiency. Deep expertise in data engineering, data science, cloud-native technologies, and DevOps practices.

EMPLOYMENT HISTORY

Data Platform Engineer Amadeus, Madrid, Spain	2026 – Present
Support client onboarding to Databricks, Snowflake, and AI services on the Big Data Platform.	
Senior Cloud Data Software Engineer BASF, Madrid, Spain	2025 – 2026
- Designed data distribution strategies using Unity Catalog with Azure Data Factory and Databricks. - Developed metadata-driven framework for data ingestion.	
Machine Learning Engineer BBVA AI Factory, Madrid, Spain	2023 – 2025
- Deployed an E2E OCR tool using TextExtract, Azure LLM, and AppRunner. - Implemented a RAG pipeline for a Financial Plan creation chatbot. - Built and optimized ETL jobs with Python, PySpark, SageMaker, EMR, and S3. - Collaborated with data scientists to implement and scale models in production. - Created Docker images to replicate the CI/CD environment.	
Big Data Engineer Adaltas, Paris, France	2022 – 2023
- Developed end-to-end architecture with Cloudera Data Platform on AWS. - Presented on Vector Databases: Milvus Overview at the Summit (Morzine, France). - Utilized Terraform, Ansible, and Vagrant; contributed to TDP open-source project.	
Mathematical Models Developer Banco Nacional de Costa Rica, San José, Costa Rica	2020 – 2022
- Developed ML projects for risk departments using Python and Matlab. - Designed parametric model for ATM failure classification; built IFRS9 expected loss models with EY.	
Professor of Mathematics Universidad de Costa Rica, San José, Costa Rica	2019 – 2020
Taught Differential Equations, Optimization, and Linear Algebra to Engineering and Economics students.	
Research Assistant Universidad de Costa Rica, San José, Costa Rica	2016 – 2018
Mathematical models for prevention and control strategies of Aedes Aegypti in Costa Rica.	
EDUCATION	
Applied MSc in Data Engineering for AI DSTI School of Engineering, France · Summa Cum Laude	2021 – 2023
MSc in Mathematical Methods & Applications Universidad de Costa Rica	2020 – 2023
Bachelor of Mathematics Universidad de Costa Rica · GPA: 3.7	2015 – 2019
